Profile

I'm an **agile architect** and **technical Lead** with a **master in communication systems** from **EPFL** (ic.epfl.ch) and a **MBA in management of technology** (EPFL EMBA, mot.epfl.ch) joint program between HEC Unil Lausanne and EPFL. With an entrepreneurial mindset, I have helped many startups to grow from a bunch of heroes to a structured and mature company. My objective is to facilitate creativity and empowerment in a team and lead amazing, innovatives projects.

Education

EPFL EMBA, HEC, BiMBA (2012 – 2013)

The EPFL EMBA program is a joint program between EPFL, HEC UNIL and BiMBA targeting entrepreneurship, innovation and management of technology.

<http://mot.epfl.ch>

Life certificate (Lausanne) 1976.11		

Skills

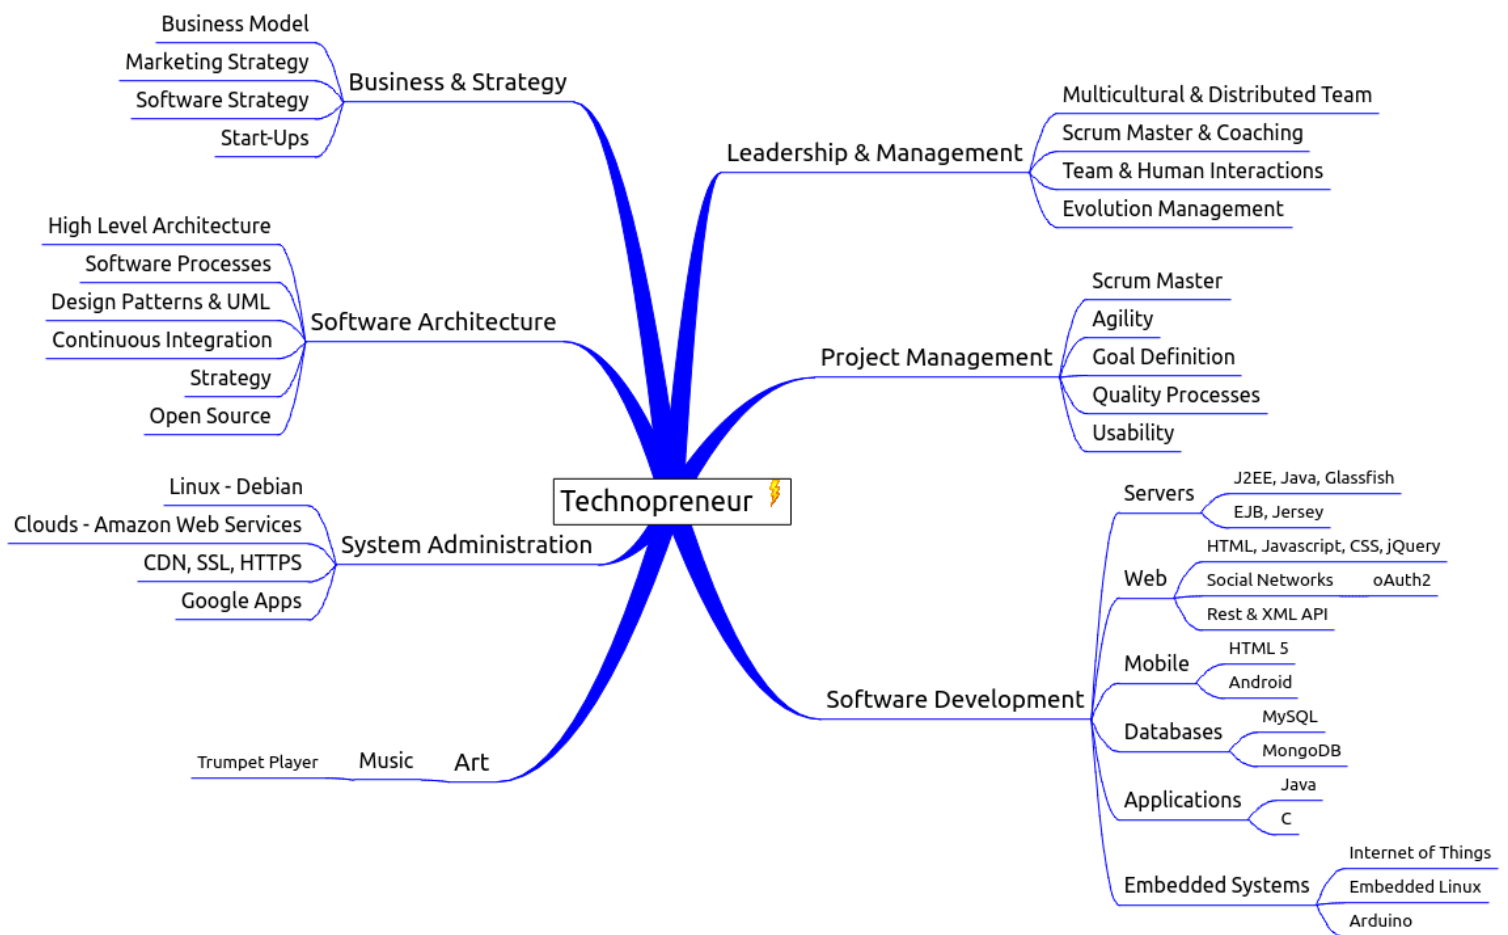

I have worked in three Startups at and through different maturity levels. I have had the opportunity to assume many different roles that require a large set of expertise and I have set processes to develop an efficient team in a pleasant working environment. I love to have different roles tuned to the current need of the company.

I have a particular interest in a mix of technologies – hardware – software – mobile - servers and cloud. With a preference for open-source technologies and open systems.

I have developed my skills in

- * Technical Architecture: Build and maintain a good and sustainable technical environment.
- * Management and leadership: Build an efficient team and working environment. My strategy is to develop a good working environment where people feel comfortable, secure, happy to work. Agility, scrum and communication are some of the tools I use.
- * Strategy and Innovation: Facilitate communication between developers and other people of the team – understand and develop the strategy of the company focusing on IT/Software modern capabilities and limitations.

Technically, I have an expertise in cloud solutions (AWS), Linux (debian), J2EE, MySql, Java, Android, HTML / Javascript and many other protocols / languages. I have a strong personal interest on raspberry and arduino.

Professional Experience

Léman Micro Devices (2013.07 – now, ~5 years) as **IT Manager & Software Architect**

LMD is a startup of 16 employees that is developing an innovative medically certified solution to monitor blood pressure with a mobile phone – It's a hardware – mobile – web company targeting mainstream B2B with a B2C product. I lead the software excellence and architecture. I have built and managed a team of 5 people. In relation with my MBA, I have defined a business model targeting our users and the technical / software strategy for the company.

Sword Consulting (2012.09 - 2013.03, 7 months) as **Web and Mobile Consultant**
SDATAWAY (2011.10 - 2012.04, 7 months) as **Software Engineer and Project Manager**
ElanIt / IMD (2011.09 - 2011.10, 2 months) as **Mobile Architect and Developer**

Poken (sold to GES) (2008.06 - 2011.08, 3 years) as **Chief Software Architect**

Startup of 5 (start) to 30 employees. With this company we created an event oriented product that facilitate interaction between people. The solution is a mix of hardware, web and cloud services and a part of it was based on my EPFL master project. This solution has 4 millions users now, and 15 millions interactions. As the key responsible of our IT department, I had multiple roles adapted to the need of the company. Managed and coached the software team distributed in Switzerland – Romania and California, set the software architecture and processes of the company, set agile processes to create software, develop and maintain the Poken solution. I have actively participated in the product idea and product creation at all levels: Vision, Project, Product, Execution, Architecture, Operational.

AdsClick (closed) (2004.12 - 2008.05, 3.5 years) as **Software Architect and Engineer**

We created an alternative to Google AdWords and AdSense in the domain of on-line marketing. I have built the contextual AdServer, the fraud detection engine and data analysis system. They were the most sensitive parts of the platform in term of performance, high availability and quantity of data. Our solution was running on the front page of Wanadoo that was the most popular page in France at this time.

Epsic (2004 - 2008, 20%) as **Teacher computer systems**
IMD (2004.03 - 2003.11, 8 months) as **Social networks scientist**
Sunrise, Zurich (2003.03 - 2003.09, 7 months) as **Java developer, Oracle and .Net (C#)**
Fabric | CH (1998.11 - 2000.06, 20%) as **HTML, C++ developer**
EPFL (During my studies) as **Websites developer, C++ developer**
Consultant (Since 1996) as **Internet Websites for associations**

Languages

French Mother tongue
